

Jeffrey Keen invites you to a brief talk that includes:

- 1. Why the act of consciously observing non-quantum experiments may affect their results.**
- 2. Also discussed are that some quantum effects are observed in the macro world.**
- 3. How does Einstein's "spooky" *Action at a Distance* work?**
- 4. Why, after nearly 100 years of unsuccessful theoretical research, are there so many unsuccessful and untestable theories of quantum gravity?**

This talk highlights an innovative new approach to physics research that involves the mind and consciousness. The techniques used include Noetics, dowsing, and visualization to investigate Subtle Energies, Psi Lines, Auras, and the relevance of Geometry.

This is ground breaking scientific research that leads to exciting conclusions involving graphs, mathematics, universal constants, equations, and eventually the Cosmos!
